We acquire underperforming or lightly distressed Class A and B multifamily properties in high-growth Sun Belt markets. Our approach combines targeted capital improvements with in-house property management and AI-driven operational tools to drive NOI growth and position assets for a premium exit. We do not operate as a fund — every deal is a direct partnership with a single committed capital partner.

HOW WE MANAGE — OUR OPERATIONAL MODEL

Once acquired, every asset is managed directly by FoxRidge. We do not outsource property management. Our in-house team, combined with AI-driven tools, delivers institutional-grade operations at the asset level — driving NOI, protecting capital, and positioning for a premium exit.

THREE PILLARS OF VALUE CREATION

01

Operational Repositioning

Revenue optimization, lease-up velocity, and expense ratio discipline through in-house property management. We tighten operations, reduce vacancy, and improve NOI through management discipline — not construction.

02

Direct Oversight of Capital Improvements

Light, targeted unit upgrades and common area enhancements — cosmetic improvements that drive rent premiums without heavy construction risk. Hands-on oversight of every dollar spent on improvements.

03

AI-Driven Property Management

Implementation of AI-powered tools for tenant communication, maintenance coordination, predictive analytics, and on-site operational efficiency — delivering institutional-grade management at the asset level.
